Summer Environmental Exchange (SEE) at Lake Tahoe and Lake Baikal

Bella Gordon:

"We were introduced to so many spheres of environmental work – from first hand research experiences in botany and limnology, to inspiring examples of NGO and volunteer work, to meetings with dozens of regional stakeholders and gaining a perspective on how their diverse values, methods, and influences come together to create history. I have come away with questions and interests I will pursue for the rest of my life."

Michelle Jordan:

"The true power of TBI comes from it's universality: no matter where your horizons rest, TBI will broaden them. After a summer surrounded by intelligent, passionate people, exploring new areas of the world, the sciences, and the humanities, I guarantee you will leave wanting to make a difference."

Denis Sandanov:

"The Tahoe-Baikal Institute's SEE program had a major impact on my future. The main value of the program consists of the fact that over 10 weeks specialists in biology, ecology, and nature protection have a unique opportunity to learn many interesting things about the ecosystems of two of the most beautiful lakes of the world (Tahoe and Baikal.)"

Program Highlights

- Unique place-based education program at Lakes Tahoe and Baikal
- Inter-cultural program brings together 18 participants from USA, Russia, and other countries
- Multi-disciplinary and hands-on curriculum focused on watershed management
- Approximately 10 weeks from mid-June to late-August 2009 (5 weeks each location)
- Program Fee covers travel between Tahoe and Baikal & all food, lodging and program expenses

Financial aid and academic credit available
